

## EDUCATION

---

### Virginia Tech College of Engineering

*Bachelor of Engineering in Computer Science*

- **Minors:** Mathematics & Artificial Intelligence

Blacksburg, VA

*Aug 2024 – May 2027 (Senior)*

## SKILLS

---

**Languages:** Python, Java, C, JavaScript, TypeScript, SQL, MATLAB

**Frameworks & Libraries:** Next.js, React, FastAPI, Scikit-learn

**Databases:** PostgreSQL, Firebase Firestore

**Tools & Technologies:** Git, Docker, Linux, Alembic, Cloudinary, Streamlit

**Certifications:** Stanford Machine Learning Specialization, 15 Anthropic courses, AWS AI Practitioner (In Progress)

**APEX Center for Entrepreneurship:** Spring 2026 Showcase Presenter; \$500 Venture Grant Recipient

## WORK EXPERIENCE

---

### Art in Progress (artinprogress.media)

*Co-Founder and Software Engineer*

Blacksburg, VA

*Mar 2026 – Present*

- Co-founded a social platform designed to revolutionize how emerging artists build careers through **structured feedback, curated opportunities, and targeted networking**.
- Conducted **30+ customer discovery interviews** and launched an initial product test with 20 users using feedback to refine the platform's product direction.
- Designed, developed, and deployed the company's landing page using **JavaScript, HTML/CSS, and Netlify**, establishing initial web presence and artist-facing acquisition funnel.
- Currently engineering the MVP while executing a marketing campaign and building relationships with local artist communities.

### Innovate Living Learning Community

*Director of Engagement and Wing Mentor*

Blacksburg, VA

*Aug 2025 – Present*

- Planned and executed 30+ community events, **managing logistics, stakeholder coordination, and post-event assessment** for 170+ residents.
- Partnered with university administrators, student leaders, and guest speakers to deliver professional development programming and address community needs.
- Mentored first-year students and new staff members, providing guidance on academics, career development, and campus involvement.

### Idea Lab

*Co-Director*

Blacksburg, VA

*Dec 2025 – May 2026*

- Grew the Idea Lab cohort from **2 to 20+ students** through targeted recruitment and outreach focused on entrepreneurship and venture creation.
- Redesigned curriculum around **idea validation, customer discovery, and problem-solution fit**, replacing worksheets with interactive workshops.
- Led workshops and feedback sessions that helped student teams **test ideas, gather customer insight, and refine their ventures**.

## PROJECTS

---

### • M.A.P.L.E. (My Advanced Personal Logic Engine):

- Developing a **Python/FastAPI personal AI assistant** designed to maintain persistent context and provide context-aware support across learning, planning, and long-term projects.

### • Small Business Loan Predictor:

- Built and deployed a **Scikit-learn machine learning pipeline** using 899K+ SBA loan records, applying feature engineering and class-imbalance mitigation to predict small-business loan outcomes and deploying the model through Streamlit.
